DETAILED ACTION

This application is a DIV of 10/076,163, which has been abandoned. Claims 1-15 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reason apply:

- a. Claim 1 recites many limitation that are generally “substituted” without reciting the intended substituents. In the absence of the specific moieties intended to effectuate modification by “substitution” or attachment to the chemical core claimed, the term “substituted” renders the claims in which it appears indefinite in all occurrences wherein applicant fails to articulate by chemical name, structural formula or sufficiently distinct functional language, the particular moieties applicant regards as those which will facilitate substitution, requisite to identifying the composition of matter claimed.
- b. Claims 2-15 are rejected as being dependent on claim 1, and carrying over limitations that are generally substituted.

Art Unit: 1624

- c. Claim 15 recites the limitation of "inhibiting HIV", it is unclear if the term "inhibiting" means to prevent the outbreak of HIV, or to prevent patient from contracting HIV, or to stop the reproduction of HIV. Because the term "inhibiting" can be interpreted many ways, and does not have the definite metes and bounds, said term renders claim 15 indefinite.

References cited on PTO-892

2. References cited on PTO-892 only show state of the art. While they teach substituted thiazolyl urea, or isothiazolyl urea, they fail to teach a substituent equivalent to R₅-cyclopropyl. Therefore, they do not anticipate or render obvious the instant claims.
